The Power of RichContent

This ground-breaking tool will ignite your new domain registrations, increase domain renewals, and ultimately deliver an enriching experience for both customers and end consumers — transform the conversation from cost to value. Customers can get all their content needs met within a single interface rather than managing multiple ineffective RSS feeds or paying the high cost for custom content.

End User Benefits

- An inexpensive solution with access to millions of rights-cleared articles and videos in numerous categories
- A simple, copy-and-paste widget that displays content to match your site's look and feel
- A Hassle-free, time saving tool that does the work
- A Low-cost, high scale way to give your users what they're looking for while expanding your site's depth

Content Library

- 150,000+ videos
- Over 400,000 articles
- Millions of blog articles
- 3,000 new pieces of content added per day and growing. From leading websites and premium brands; such as:

How RichContent Works

A RichContent widget is a portable piece of code that can be placed on your website to display RichContent related articles and videos. Widgets can be used for displaying related links, full articles and videos. See a Demonstration of RichContent at janessupergarden.com.

1 Related Content widget

Reads existing content on your page and shows visitors links to similar or related articles, videos, and topics.

2 Landing Page widget

When visitors click on any related content, the widget displays the full article, a video, or a topic page.
